

Steps to withdraw money from an ATM (Automated Teller Machine)

An ATM is an automated device which enables various banking transactions like withdrawals, deposits, transfers, and balance inquiries without visiting a bank. Below is the picture of an ATM machine.

ATM machine

Here are the steps to withdraw money from an ATM machine using Debit/Credit cards.

1. Insert card (Debit/Credit) into the Card Reader slot with the chip facing up.
2. Select your preferred Language from the Display Screen.
3. Type your four digit pin using Keypad and press Enter.
4. Select option "Withdrawal".
5. Enter the amount to withdraw and press Enter.
6. Wait while the ATM dispenses cash.
7. Collect cash from Cash Dispenser immediately.
8. Collect receipt from the Receipt Printer (optional).

Caution : Do not share your pin. Do not forget to collect your card and cash.
